

Earn a Master of Science in Agricultural Education

Looking to advance your career in the field of agriculture and beyond? A Master of Science in Agricultural Education at The University of Arizona offers students flexible curriculum, in-person and online modalities, and the option to graduate in one year for full-time students. Enjoy a core course load of courses in teaching, research (methods and design), and program planning/evaluation then select from a range of additional course options to help you achieve your unique personal and career goals.

Two degree options:

Research Emphasis:

- In-person
- Complete a thesis
- Option to receive Assistantship

Professional Emphasis:

- Online
- Complete a comprehensive exam
- Earn your degree while working
